FACT

BENEFIT

Plush VISCOSE BREATHE sides Luxurious moisture dispensing VISCOSE BREATHE blue gel and Hyper Soft polyurethane layers offer a comfortable yet supportive plush top and bottom layer.

Linear Pocket The pockets springs are individually wrapped before being cold glued together.

Foam Encased The spring unit is encased in a high density firm polyurethane foam as a reinforced edge support and zero sag.

Minimal Transfer The Pocket Spring unit, being individually packed and glued together limits the movement transfer and your partner will not be disturbed if you toss and turn.

Electronically Tempered The pockets spring units are electronically tempered for more rigidity and to ensure a minimal compression set.

Open cell technology Polyurethane Foam is manufactured with an open cell structure which allows for ventilation ensuring an ultra hygienic sleep environment.

Imported Ticking The soft touch jacquard ticking is micro-quilted to ensure optimum heat dissipation.

Hygienic & Non Toxic All foams used in the manufacturing process are produced in-house at Strandfoam Group and is completely stable, non-toxic and Hygienic.

Dual Sided The ST ANDREWS offers the benefit of dual sleeping surfaces for prolonged comfort and support.
