

## FACT

## BENEFIT

*Plush Micro Quilted Top*

Luxurious moisture dispensing BLUE BEAD Hyper Soft polyurethane layers offer a comfortable yet supportive top layer.

*Linear Pocket*

The pockets springs are individually wrapped before being cold glued together.

*Foam Encased*

The spring unit is encased in a high density firm polyurethane foam as a reinforced edge support and zero sag.

*Minimal Transfer*

The Pocket Spring unit, being individually packed and glued together limits the movement transfer and your partner will not be disturbed if you toss and turn.

*Electronically Tempered*

The pockets spring units are electronically tempered for more rigidity and to ensure a minimal compression set.

*Open cell technology*

Polyurethane Foam is manufactured with an open cell structure which allows for ventilation ensuring an ultra hygienic sleep environment

*Imported Ticking*

The soft touch jacquard ticking is micro-quilted to ensure optimum heat dissipation.

*Hygienic & Non Toxic*

All foams used in the manufacturing process are produced in-house at Strandfoam Group and is completely stable, non-toxic and Hygienic.

*Non Turn*

Simple rotation of the mattress will ensure both comfort and longevity without having to turn the mattress.
