

WHISPER

'FERAN ICE

Feran Ice technology incorporated in the fabric has exceptional temperature regulation and heat dissipation, for a better night's rest.

BLACK ICE.

Black Ice contains ceramic infusion which adds enhanced conductivity to the exceptional comfort and support characteristics of gel foam. Scientifically proven to be up to 20% cooler than traditional foam, which contributes to a much cooler, comfortable sleep.

ULTRA FLEX FOAM

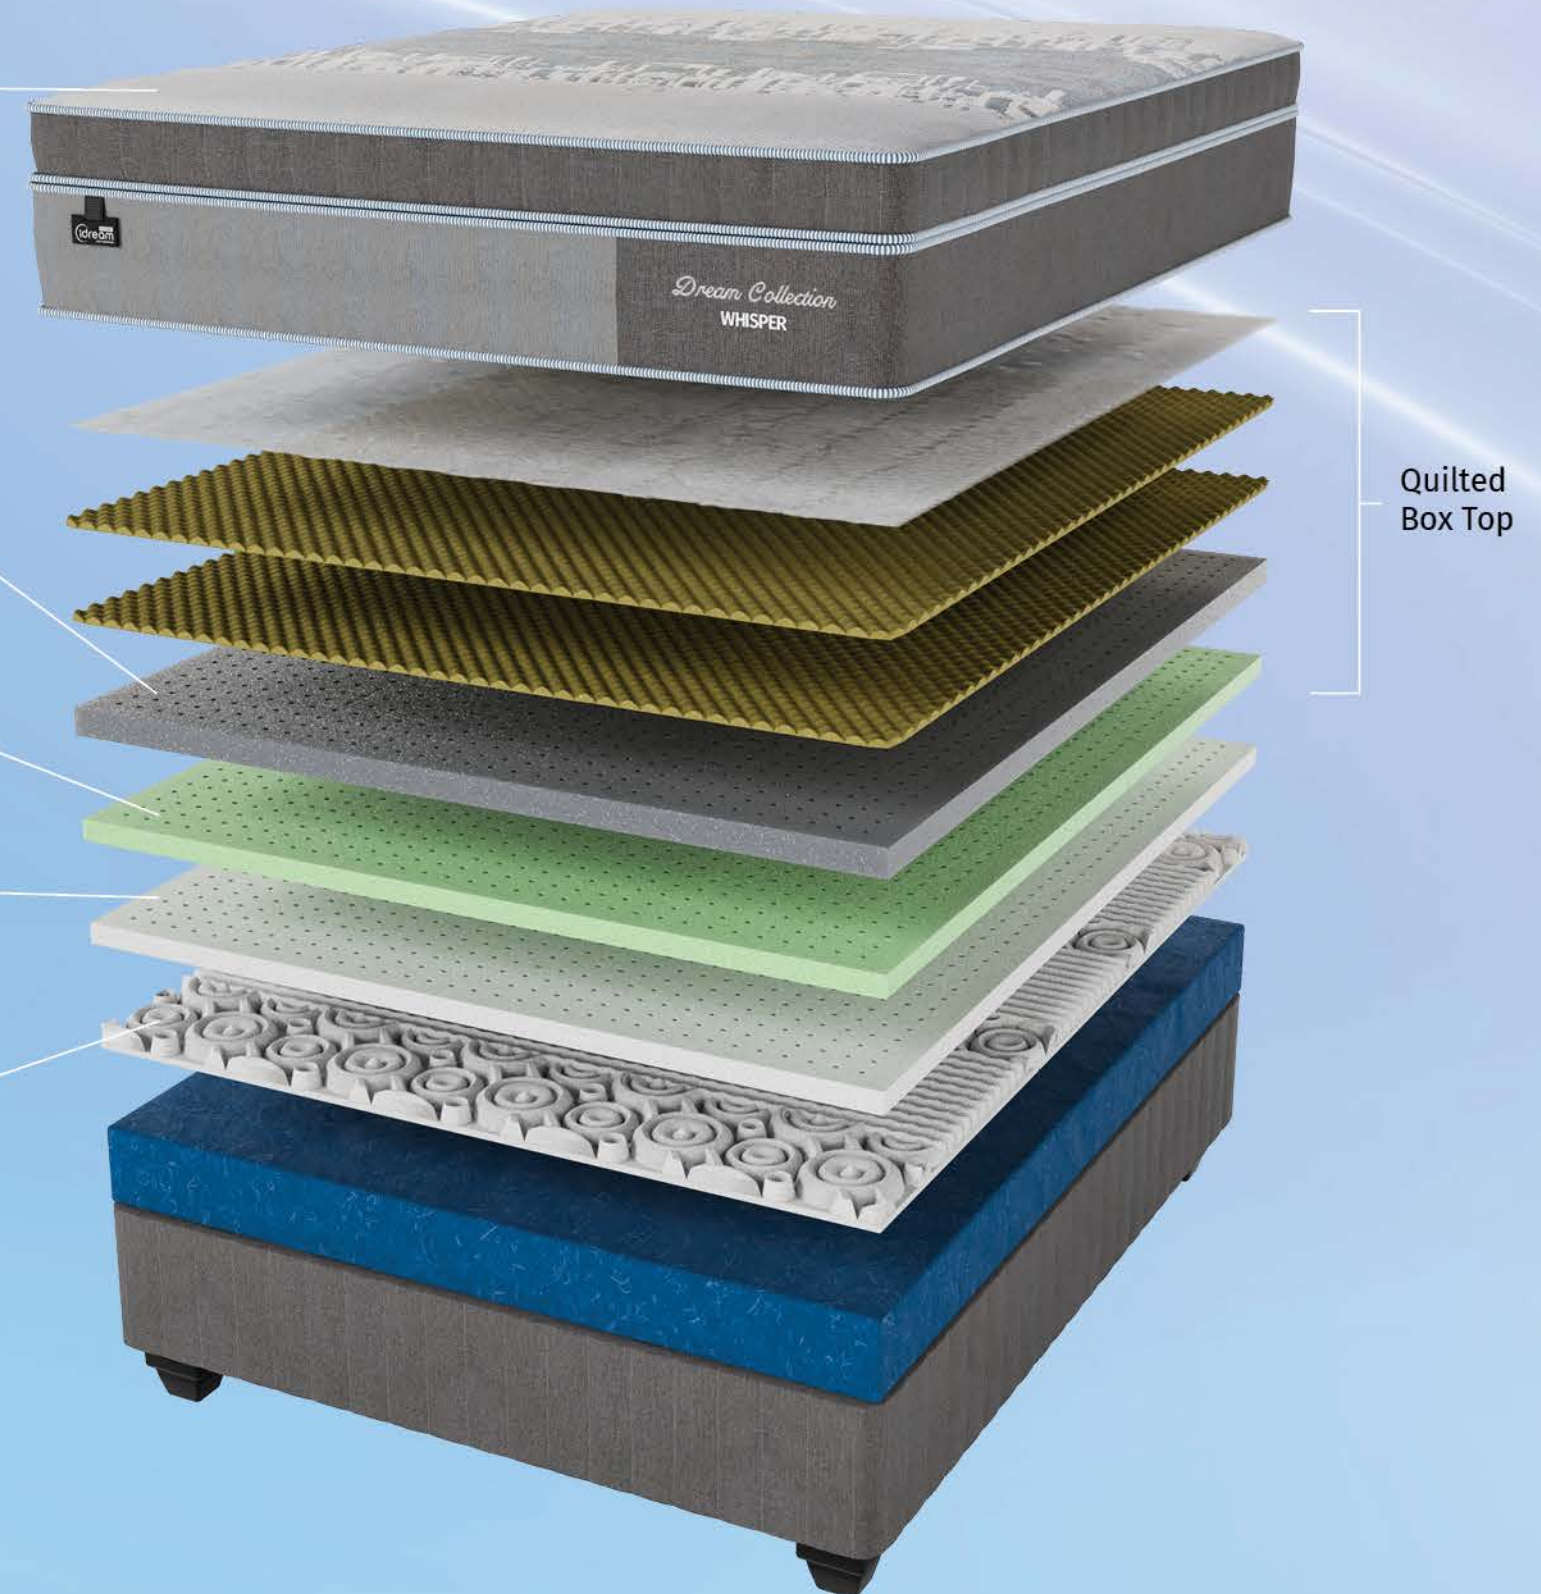

This ultra high-density foam contours perfectly to your body. It provides unparalleled pressure point relief, ensuring a deeply restful and long-lasting night's sleep.

activeair

Our latest range of infused foams now incorporates aeration technology. It uses micro air channels, uniformly punched through the comfort layers, to further improve the thermal regulating and hygienic properties of the mattress through effective air flow.

ZONAL-FLEX+

Zonal-Flex is a contoured foam technology designed for head-to-toe comfort and support. The seven carefully placed zones provide the ultimate combination of body support and pressure relief, enhancing lumbar support and reducing pressure points.
