Pocket Spring

EXCLUSIVE LIMITED EDITION

FACT

BENEFIT

Plush Micro Quilted Top

Blue Gel & Plush Hypersoft Layers for comfort and support.

Linear Pocket

The pocket springs are individually wrapped before being cold glued together.

Foam Encased

The spring unit is encased in a high density firm polyurethane foam as a reinforced edge support and zero sag.

Minimal Transfer

The Pocket Spring unit, being individually packed and glued together limits the movement transfer and your partner will not be disturbed if you toss and turn.

Electronically Tempered

The pocket spring units are electronically tempered for more rigidity and to ensure a minimal compression set.

Open cell technology

Polyurethane Foam is manufactured with an open cell structure which allows for ventilation ensuring an ultra hygienic sleep environment

Imported Ticking

The soft touch jacquard ticking is micro-quilted to ensure optimum heat dissipation.

Hygienic & Non Toxic

All foams used in the manufacturing process are produced in-house at Strandfoam Group and is completely stable, non-toxic and Hygienic.

Dual Sided

The FLEX-NAP offers the benefit of dual sleeping surfaces for prolonged comfort and support.
